Index of Subjects

VOLUME 67, 1987

(Abstracts from Society Proceedings are not included)

Action potentials
- from the optic nerve, 549
- MUAPs studied by multi-channel surface EMG, 395

Active movement, *see* Voluntary movement
Adaptative EEG segments via map criteria, 271
Alcoholic liver disease and BAEPs, 337
Alpha rhythm
- adaptative EEG segments via map criteria, 271
- Fz theta/alpha bursts in newborns, 27

Anesthetics
- ketamine anesthesia and rat BAEPs, 570
- xenon effects on EEG spectra, 340

Antiepileptic drugs
- and repeated seizures, 171
- benzodiazepine sensitivity testing, 197
- management of intractable seizures, 197

Antisocial behavior
- AEPs in hyperactive and normal children, 531

Ataxia
- SEPs and VEPs in the late onset ataxia, 514

Attention and high frequency scalp potentials, 222
Auditory brain-stem potentials
- alligator BAEPs, 68
- and hepatic diseases, 337
- effects of ketamine anesthesia, 570
- fiber tract model of BAEPs, 53
- in congenital hypothyroidism, 521
- subthalamic origin of P15 SEP wave, 134
- temperature and hypoxia effects, 68
- 40 Hz AEPs in comatose patients, 213

Auditory responses
- auditory responsivity in newborns, 204
- in hyperactive and normal children, 531
- intrauterine growth retardation in newborns, 204
- middle-latency AEPs, 372
- phase coherence and steady-state responses, 260
- 40 Hz AEPs in comatose patients, 213
- *see also* Auditory brain-stem potentials

Autism
- EPs and Rett syndrome, 327

Autonomic functions
- epileptogenic and cardiac neural discharge, 247

BAEPs, *see* Auditory brain-stem potentials
Behavioral correlates
- spontaneous EEG spikes in normal hippocampus, 348

Benzodiazepine sensitivity testing in childhood, 197
Bilateral synchrony
- spontaneous EEG spikes in normal hippocampus, 348

Binaural interactions
- fiber tract model of BAEPs, 53

Blink reflex
- and intracranial hemorrhage in neonates, 584
- in prematures and full-term newborns, 480
- photo-evoked eyelid microvibration in neonates, 584

Book reviews, 95, 194
Brain death
- demyelinating radiculopathy resembling brain death, 42

Brain-stem
- subthalamic origin of P15 SEP wave, 134

Cardiac neural discharge and epilepsy, 247
Cardio-respiratory measure
- machine classification of infant sleep state, 379

Cassette recording
- variable amount of spike-wave activity, 40

Cataplexy
- phasic activity in the sleep, 499
- P300 and CNV measure of daytime sleepiness, 298
- REM and NREM sleepiness, 317

Cerebrospinal fluid
- EEG and EPs in multiple sclerosis, 333

Children
- AEPs in hyperactive and normal children, 531
- benzodiazepine sensitivity testing, 197
- blink reflex in prematures and full-term newborns, 480
- comparative EEG maturation, 330
- EEG coherence, 151
- EPs and Rett syndrome, 327
- machine classification of sleep state, 379
- management of intractable seizures, 197
- SEPs and BAEPs in congenital hypothyroidism, 521
- skin potential responses during sleep, 32
- *see also* Retardation

0013-4649/87/$03.50 © 1987 Elsevier Scientific Publishers Ireland, Ltd.

Circulation
- long-latency reflexes in primate hemiplegia, 238
Classification of infant sleep state, 379
Clinical correlates
- SEPs in the late phase of head injury, 289
Cognitive impairment
- epilepsy and driving behavior, 167
Cognitive processes
- depth components of endogenous potentials, 44
Coherence
- contralateral spread of seizures, 120
- EEG coherence in children, 151
- in auditory steady-state responses, 260
- inter-hemispheric seizure propagation, 101
Coma and 40 Hz AEPs, 213
Computer
- computed far-field EP components, 176
- multi-channel EEG amplifier, 191
Conduction
- assessment of motor pathways in primates, 63
- changes of muscle fiber conduction velocity, 495
- MUAPs studied by multi-channel surface EMG, 395
- prolonged conduction block and limb myokymia, 428
- propagating potentials in skeletal muscle, 421
- SEPs and VEPs in the late onset ataxia, 514
- subthalamic origin of P15 SEP wave, 134
Contingent negative variation
- and P300 measure of daytime sleepiness, 298
- excessive daytime sleepiness in narcolepsy, 298
- REM and NREM sleepiness in narcolepsy-cataplexy, 317
Convulsant
- epileptogenic and cardiac neural discharge, 247
Corpus callosum
- contralateral spread of seizures, 120
- inter-hemispheric seizure propagation, 101
- transcallosal response in photosensitive baboon, 556, 564
Cortical potentials and EMG changes before movement, 412
Cortical stimulation
- transcallosal response in photosensitive baboon, 556, 564
Cross-reference
- simultaneous record of slow and unit potentials, 591
Cutaneous reflexes
- EMG modulation by digital nerve stimulation, 452

Daytime sleepiness
- in narcolepsy, 298
- P300 and CNV measure, 298
- REM and NREM in narcolepsy-cataplexy, 317
Delinquency
- AEPs in hyperactive children, 531
Delta rhythms
- sleep loss and eye movement density, 217
- zeta waves, 140
Dementia
- EEG and EPs in multiple sclerosis, 333
- EPs and Rett syndrome, 327
Demyelinating radiculopathy resembling brain death, 42
Depth components of endogenous potentials, 44
Development
- AEPs in hyperactive and normal children, 531
- blink reflex in newborns, 480
- comparative EEG maturation, 330
- intrauterine growth retardation in newborns, 204
- SEPs and BAEPs in congenital hypothyroidism, 521
- skin potential responses during sleep, 32
Diagnosis
- intracranial hemorrhage in neonates, 584
- photo-evoked eyelid microvibration in neonates, 584
Drugs and transcallosal response in baboons, 556, 564
Dystrophy
- MUAPs studied by multi-channel surface EMG, 395

ECoG
- simultaneous record of slow and unit potentials, 591
EEG
- adaptative EEG segments via map criteria, 271
- comparative EEG maturation, 330
- contralateral spread of seizures, 120
- demyelinating radiculopathy resembling brain death, 42
- effects of xenon on EEG spectra, 340
- epileptiform discharges and driving behavior, 167
- EEG flattenings in newborns, 16
- EEG coherence in children, 151
- Fz theta/alpha bursts in newborns, 27
- in multiple sclerosis, 333
- inter-hemispheric seizure propagation, 101
- in the late phase of head injury, 289
- multi-channel EEG amplifier, 191
- phasic activity in the sleep of narcotic patients, 499
- photoparoxysmal discharges and single seizure, 588
- premature temporal theta, 7
- scalp potentials and reaction time task, 222
- sleep loss, delta EEG, and eye movement density, 217
- spontaneous EEG spikes in normal hippocampus, 348
- the hydro-electroencephalogram, 188
- zeta waves, 140
Electrodes
- propagating potentials in skeletal muscle, 421
- sputtered gold microelectrode, 91
- the hydro-electroencephalogram, 188
EMG
- and cortical potentials before movement, 412
- and intra- and inter-subject variability, 402
- blink reflex in prematures and full-term newborns, 480
- modulation by digital nerve stimulation, 452
- MUAPs studied by multi-channel surface EMG, 395
- quantification of reciprocal activation, 389
- stability of frequency of hand tremor, 439
- transient responses in a capsular lesion, 485
- unloading reflex of a hand muscle, 447
End plate
- MUAPs studied by multi-channel surface EMG, 395
Epilepsy
- anticonvulsants and repeated seizures, 171
- benzodiazepine sensitivity testing in childhood, 197
- contralateral spread of seizures, 120

- epileptiform EEG discharges and driving behavior, 167
- epileptogenic and cardiac neural discharge, 247
- inter-hemispheric seizure propagation, 101
- management of intractable seizures in childhood, 197
- photoparoxysmal discharges and single seizure, 588
- spontaneous EEG spikes in normal hippocampus, 348
- transcallosal response in photosensitive baboon, 556, 564
- variable amount of spike-wave activity, 40

Event-related potentials
- depth components of endogenous potentials, 44
- encoding, 360
- in hyperactive and normal children, 531
- monkey ERPs in a passive paradigm, 77

Evoked potentials
- and Rett syndrome, 327
- auditory, *see* Auditory responses
- BAEPs, *see* Auditory brain-stem potentials
- computed far-field EP components, 176
- fiber tract model of BAEPs, 53
- in multiple sclerosis, 333
- in the late onset ataxia, 514
- phase coherence, 260
- P300 and CNV measure of daytime sleepiness, 298
- scalp potentials and reaction time task, 222
- somatosensory, *see* Somatosensory potentials

Eye movements
- in the sleep of narcotic patients, 499
- sleep loss and delta EEG, 217

Far-field potentials
- computed far-field EP components, 176
- specific gating of SEPs during movement, 537

Fasciculations
- prolonged conduction block and limb myokymia, 428

Forebrain
- neuronal firing in pallidal region and vigilance, 159

Frontal cortex
- Fz theta/alpha bursts in newborns, 27

Generators
- computed far-field EP components, 176
- fiber tract model of BAEPs, 53

Growth
- intrauterine growth retardation in newborns, 204
- SEPs and BAEPs in congenital hypothyroidism, 521

Hand muscles
- EMG modulation by digital nerve stimulation, 452
- stability of frequency of hand tremor, 439
- unloading reflex of a hand muscle, 447

Head trauma
- SEPs in the late phase of head injury, 289

Hemiplegia
- long-latency reflexes in primate hemiplegia, 238

Hemorrhage
- intracranial hemorrhage in neonates, 584

Hepatic diseases and BAEPs, 337

Hippocampus
- contralateral spread of seizures, 120
- depth components of endogenous potentials, 44
- spontaneous EEG spikes in normal hippocampus, 348

History
- what did Caton see?, 2

Hydro-electroencephalogram, 188

Hyperactive children, 531

Hypothyroidism, SEPs and BAEPs, 521

Hypoxia effects on alligator BAEPs, 68

Innervation zone
- propagating potentials in skeletal muscle, 421

Internal capsule
- transient responses in a capsular lesion, 485

Inter- and intra-subject variability
- EMG profiles and intra- and inter-subject variability, 402

Intracranial hemorrhage in neonates, 584

Iontophoresis
- sputtered gold microelectrode, 91

Ischemia and short latency SEPs, 147

Ketamine effects on the rat BAEPs, 570

Kindling phenomenon
- anticonvulsants and repeated seizures, 171
- transcallosal response in photosensitive baboon, 556, 564

Laminar analysis
- spontaneous EEG spikes in normal hippocampus, 348

Learning
- encoding and ERPs, 360
- scalp potentials and reaction time task, 222

Lesions
- long-latency reflexes in primate hemiplegia, 238
- reflexes in spinal cord-lesioned subjects, 468
- SEPs in the late phase of head injury, 289
- subthalamic origin of P15 SEP wave, 134
- transient responses in a capsular lesion, 485

Limbic system
- anticonvulsants and repeated seizures, 171
- spontaneous EEG spikes in normal hippocampus, 348

Magnetic resonance imaging
- EEG and EPs in multiple sclerosis, 333

Maturation
- comparative EEG maturation, 330
- *see also* Retardation

Median nerve
- subthalamic origin of P15 SEP wave, 134

Memory
- encoding and ERPs, 360

Method of stimulation and reflex variability, 464

Microelectrode
- sputtered gold microelectrode, 91

Middle-latency responses
- AEPs, 372
- 40 Hz AEPs in comatose patients, 213

Models
- computed far-field EP components, 176
- fiber tract model of BAEPs, 53
Monitoring
- variable amount of spike-wave activity, 40
Motor activity
- scalp potentials and reaction time task, 222
Motor action potentials
- changes of muscle fiber conduction velocity, 495
- MUAPs studied by multi-channel surface EMG, 395
- propagating potentials in skeletal muscle, 421
- stability of frequency of hand tremor, 439
Motor control
- EMG modulation by digital nerve stimulation, 452
Motor cortex
- assessment of motor pathways in primates, 63
Movement
- eye movement, *see* Eye movements
- quantification of reciprocal activation, 389
- specific gating of SEPs during movement, 537
- transient responses in a capsular lesion, 485
MUA recording
- simultaneous record of slow and unit potentials, 591
Multiple sclerosis, EEG and EP studies, 333
Muscle
- changes of muscle fiber conduction velocity, 495
- intra- and inter-subject variability of EMG, 402
- MUAPs studied by multi-channel surface EMG, 395
- phasic activity in the sleep of narcotic patients, 499
- prolonged conduction block and limb myokymia, 428
- propagating potentials in skeletal muscle, 421
- quantification of reciprocal activation, 389
- reflex variability and method of stimulation, 464
- unloading reflex of a hand muscle, 447
Myokymia
- prolonged conduction block and limb myokymia, 428

Narcolepsy
- P300 and CNV measure of daytime sleepiness, 298
- REM and NREM sleepiness, 317
Neonates
- auditory responsivity, 204
- blink reflex in prematures, 480
- intracranial hemorrhage, 584
- intrauterine growth retardation, 204
- EEG flattenings, 16
- Fz theta/alpha bursts, 27
- photo-evoked eyelid microvibration, 584
- premature temporal theta, 7
- *see also* Prematures
Nerve
- epileptogenic and cardiac neural discharge, 247
- *see also* Conduction
Neurological disorders
- EEG and EPs in multiple sclerosis, 333
- EPs and Rett syndrome, 327
- intracranial hemorrhage in neonates, 584
- SEPs in the late phase of head injury, 289
- short latency SEPs and cerebral ischemia, 147
- skin potential responses during sleep, 32
Neuronal correlates
- encoding and ERPs, 360
- neuronal firing in pallidal region and vigilance, 159
Neuropathies
- prolonged conduction block and limb myokymia, 428
- SEPs and VEPs in the late onset ataxia, 514
Non-invasive assessment of motor pathways in primates, 63
Non-polarizing electrodes
- simultaneous record of slow and unit potentials, 591

Oddball paradigm
- monkey ERPs in a passive paradigm, 77
Onset of sleep onset after interruption, 508
Optic nerve compound action potentials, 549
Orbicularis oculi muscle
- photo-evoked eyelid microvibration in neonates, 584

Pallidum
- neuronal firing in sleep and wakefulness, 159
Pattern recognition
- machine classification of infant sleep state, 379
Performance
- scalp potentials and reaction time task, 222
Peroneal nerve stimulation in man, 468
Photic stimulation
- intracranial hemorrhage in neonates, 584
- photo-evoked eyelid microvibration in neonates, 584
- photoparoxysmal discharges and single seizure, 588
Photosensitive epilepsy
- transcallosal response in baboons, 556, 564
Premotor cortex
- transcallosal response in photosensitive baboon, 556, 564
Preterm infants
- blink reflex, 480
- temporal theta, 7
Preparation to movement
- EMG changes and cortical potentials, 412
Primates
- assessment of motor pathways in primates, 63
Prognosis
- intracranial hemorrhage in neonates, 584
Pyramidal tract assessment in primates, 63
P300
- and CNV measure of daytime sleepiness, 298
- depth components of endogenous potentials, 44
- encoding and ERPs, 360
- monkey ERPs in a passive paradigm, 77
- REM and NREM sleepiness in narcolepsy-cataplexy, 317

Quantitative analysis
- comparative EEG maturation, 330
- *see also* Spectral analysis

Radiculopathy resembling brain death, 42
Radiological correlates
– SEPs in the late phase of head injury, 289
Reaction time task and scalp potentials, 222
Recording methods
– what did Caton see?, 2
Recovery cycle
– transcallosal response in photosensitive baboon, 556, 564
Reference
– simultaneous record of slow and unit potentials, 591
– the hydro-electroencephalogram, 188
Reflexes
– blink reflex in prematures and full-term newborns, 480
– effects of peroneal nerve stimulation in man, 468
– EMG modulation by digital nerve stimulation, 452
– long-latency reflexes in primate hemiplegia, 238
– reflex variability and method of stimulation, 464
– unloading reflex of a hand muscle, 447
Retardation
– auditory responsivity in newborns, 204
– EEG coherence in children, 151
– intrauterine growth retardation in newborns, 204
– skin potential responses during sleep, 32
Rett syndrome and EPs, 327

Sciatic nerve
– fiber tract model of BAEPs, 53
Seizure
– anticonvulsants and repeated seizures, 171
– contralateral spread of seizures, 120
– inter-hemispheric seizure propagation, 101
– management of intractable seizures in childhood, 197
– photoparoxysmal discharges and single seizure, 588
Sensory responses and cerebral ischemia, 147
Silent period
– cortical potentials before movement, 412
Simulation
– computed far-field EP components, 176
Single seizure and photoparoxysmal discharges, 588
Skin potential response during sleep, 32
Skin stimulation
– SEPs to sharp-fronted air-puff stimulation, 231
Sleep
– EEG flattenings in newborns, 16
– interruption of sleep in long-sleeping subjects, 508
– machine classification of infant sleep state, 379
– phasic activity in narcotic patients, 499
– skin potential responses during sleep, 32
– sleep loss, delta EEG, and eye movement density, 217
– sleep onset after interruption, 508
Sleepiness
– multiple sleep latency test, 298, 317
– narcolepsy-cataplexy, 298, 317
– P300 and CNV measure of daytime sleepiness, 298
– REM and NREM sleepiness in narcolepsy-cataplexy, 317
Sleep-wakefulness cycle
– neuronal firing in pallidal region, 159
Slow potentials
– simultaneous record of slow and unit potentials, 591

– auditory steady-state responses, 260
– comparative EEG maturation, 330
– effects of xenon on EEG spectra, 340
– stability of frequency of hand tremor, 439
Spike
– spontaneous EEG spikes in normal hippocampus, 348
Spike-wave
– variable amount of spike-wave activity, 40
Spinal cord
– reflexes in spinal cord-lesioned subjects, 468
Stationary potentials
– computed far-field EP components, 176
Steady-state auditory response and phase coherence, 260
Stimulation
– reflex variability and method of stimulation, 464
Stretch reflex
– EMG modulation by digital nerve stimulation, 452
Stroke
– long-latency reflexes in primate hemiplegia, 238
Subclinical abnormalities
– epileptiform EEG discharges and driving behavior, 167

Tasks
- depth components of endogenous potentials, 44
- scalp potentials and reaction time task, 222
Technique
- computed far-field EP components, 176
- fast air-puff stimulator, 231
- machine classification of infant sleep state, 379
- simultaneous record of slow and unit potentials, 591
- sputtered gold microelectrode, 91
- the hydro-electroencephalogram, 188
Telemetry
- epileptiform EEG discharges and driving behavior, 167
Temperature effects on alligator BAEPs, 68
Temporal lobe
- contralateral spread of seizures, 120
- depth components of endogenous potentials, 44
- inter-hemispheric seizure propagation, 101
- premature temporal theta, 7
Tendon reflexes
- reflex variability and method of stimulation, 464
Thalamus
- short latency SEPs and cerebral ischemia, 147
- subthalamic origin of P15 SEP wave, 134
Therapy control
- anticonvulsants and repeated seizures, 171
- management of intractable seizures in childhood, 197
- variable amount of spike-wave activity, 40
Theta rhythm
- Fz theta/alpha bursts in newborns, 27
- premature temporal theta, 7
Threshold
- auditory steady-state responses, 260
Topography
- adaptative EEG segments via map criteria, 271
- multi-channel EEG amplifier, 191
Tracé alternant
- EEG flattenings in newborns, 16
Tremor
- stability of frequency of hand tremor, 439

Unitary activity
- in pallidal region in sleep and wakefulness, 159
- simultaneous record of slow and unit potentials, 591

Visual evoked potentials
- in the late onset ataxia, 514
Visual task
- EEG coherence in children, 151
- scalp potentials and reaction time task, 222
Volume conduction
- fiber tract model of BAEPs, 53
Voluntary movement
- changes of muscle fiber conduction velocity, 495
- EMG changes and cortical potentials before movement, 412
- quantification of reciprocal activation, 389
- specific gating of SEPs during movement, 537

Wave form of middle-latency AEPs, 372

Xenon effect on EEG spectra, 340

Zeta waves, 140

Electroencephalography and clinical Neurophysiology, 1987, 67: 615–619
Elsevier Scientific Publishers Ireland, Ltd.

Table of Contents

VOLUME 67, 1987

CLINICAL SECTION

MAIN ARTICLES

Premature temporal theta (PTθ) (EEG 03266)
by J.R. Hughes, J.J. Fino and L.A. Hart (U.S.A.) 7
Transient flattenings in the EEG of newborns — a benign variation (EEG 01913)
by M.J. O'Brien, Y.L. Lems and H.F.R. Prechtl (The Netherlands) 16
Fz theta/alpha bursts: a transient EEG pattern in healthy newborns (EEG 03186)
by F. Hayakawa, K. Watanabe, S. Hakamada, K. Kuno and K. Aso (Japan) 27
Developmental disorders of skin potential responses in mentally retarded children during nocturnal sleep (EEG 03233)
by M. Shibagaki, S. Kiyono and T. Takeuchi (Japan) 32
Inter-hemispheric propagation of human mesial temporal lobe seizures: a coherence/phase analysis (EEG 03291)
by J.P. Lieb, K. Hoque, C.E. Skomer and X.-W. Song (U.S.A.) 101
Interhemispheric interactions in seizures of focal onset: data from human intracranial recordings (EEG 03282)
by J. Gotman (Canada) 120
Clinical evidence supporting a subthalamic origin of the P15 wave of the somatosensory evoked potentials to median nerve stimulation (EEG 01917)
by F. Momma, H.I. Sabin, L. Symon and N.M. Branston (U.K.) 134
Zeta waves: a special type of slow delta waves (EEG 01946)
by O. Magnus and M. Van der Holst (The Netherlands) 140
Benzodiazepine sensitivity testing in the management of intractable seizure disorders in childhood (EEG 01813)
by J.H. Livingston, A. Anderson, J.K. Brown and A. McInnes (U.K.) 197
Auditory responsivity and intrauterine growth retardation in small for gestational age human newborns (EEG 03270)
by R.D. Todorovich, D.H. Crowell and L.E. Kapuniai (U.S.A.) 204
40 Hz — middle latency auditory evoked response in comatose patients (EEG 03265)
by R. Firsching, J. Luther, E. Eidelberg, W.E. Brown, Jr., J.L. Story and F.A. Boop (U.S.A.) 213
Clinical and radiological correlates of somatosensory evoked potentials in the late phase of head injury: a study of 500 Vietnam veterans (EEG 03312)
by B. Jabbari, S.C. Vance, M.G. Harper, A.M. Salazar, M.A. Smutok and D. Amin (U.S.A.) 289
Complex event-related potentials (P300 and CNV) and MSLT in the assessment of excessive daytime sleepiness in narcolepsy-cataplexy (EEG 03252)
by M. Aguirre and R.J. Broughton (Canada) 298
Differences between REM and NREM sleepiness measured by event-related potentials (P300, CNV), MSLT and subjective estimate in narcolepsy-cataplexy (EEG 03300)
by R.J. Broughton and M. Aguirre (Canada) 317
Rapid eye movements, muscle twitches and sawtooth waves in the sleep of narcoleptic patients and controls (EEG 01965)
by P. Geisler, K. Meier-Ewert and K. Matsubayshi (F.R.G.) 499
Sleep onset REM periods observed after sleep interruption in normal short and normal long sleeping subjects (EEG 03340)
by K. Fukuda, A. Miyasita and M. Inugami (Japan) 508
Involvement of somatosensory and visual pathways in late onset ataxia (EEG 01964)
by U. Nousiainen, J. Partanen, V. Laulumaa and A. Pääkkönen (Finland) 514
Somatosensory evoked potentials and auditory brain-stem responses in congenital hypothyroidism. II. A cross-sectional study in childhood. Correlations with hormonal levels and developmental quotients (EEG 03212)
by E. Laureau, R. Hebert, M. Vanasse, J. Letarte, J. Glorieux, M. Desjardins and J.H. Dussault (Canada) 521

0013-4649/87/$03.50 © 1987 Elsevier Scientific Publishers Ireland, Ltd.

Longitudinal study of AERPs in hyperactive and normal children: relationship to antisocial behavior (EEG 03367)
by J.H. Satterfield, A.M. Schell and R.W. Backs (U.S.A.) 531

SHORT COMMUNICATIONS

Day by day variations of the amount of spike-wave activity in 24 hour cassette recordings (EEG 01978)
by W. Burr and H. Stefan (F.R.G.) 40
Fulminant demyelinating polyradiculoneuropathy resembling brain death (EEG 03333)
by I. Drury, B.F. Westmoreland and F.W. Sharbrough (U.S.A.) 42
Short-latency somatosensory evoked potentials correlate with the severity of the neurological deficit and sensory abnormalities following cerebral ischemia (EEG 03241)
by D. Karnaze, M. Fisher, J. Ahmadi and P. Gott (U.S.A.) 147
Effects of sleep loss on delta (0.3–3 Hz) EEG and eye movement density: new observations and hypotheses (EEG 03363)
by I. Feinberg, T.C. Floyd and J.D. March (U.S.A.) 217
Rett syndrome — a gray matter disease? Electrophysiologic evidence (EEG 03416)
by N.P. Verma, M.A. Nigro and Z.H. Hart (U.S.A.) 327
EEG developmental equations confirmed for Cuban schoolchildren (EEG 01997)
by A. Alvarez, P. Valdes and R. Pascual (Cuba) 330
Evoked potentials and EEG in multiple sclerosis (EEG 03410)
by A. Pakalnis, M.E. Drake, Jr., N. Dadmehr and K. Weiss (U.S.A.) 333
Brain-stem auditory evoked potentials in different types of hepatic diseases (EEG 02008)
by N.-S. Chu and S.-S. Yang (China) 337

EXPERIMENTAL SECTION

MAIN ARTICLES

Endogenous potentials evoked in simple cognitive tasks: depth components and task correlates (EEG 03102)
by J.M. Stapleton and E. Halgren (U.S.A.) 44
A fiber tract model of auditory brain-stem responses (EEG 03204)
by A.P. Rudell (U.S.A.) 53
Non-invasive assessment of the pyramidal tract and motor pathway of primates (EEG 03119)
by A.C. Ludolph, J. Hugon and P.S. Spencer (U.S.A., F.R.G. and France) 63
Brain-stem auditory evoked potentials in the alligator. Effects of temperature and hypoxia (EEG 03286)
by G.M. Strain, T.A. Tucker, M.C. Graham and N.A. O'Malley (U.S.A.) 68
Long-latency event-related potentials in squirrel monkeys: further characterization of wave form morphology, topography, and functional properties (EEG 03259)
by J.A. Pineda, S.L. Foote and H.J. Neville (U.S.A.) 77
EEG coherence at rest and during a visual task in two groups of children (EEG 01901)
by T. Gasser, C. Jennen-Steinmetz and R. Verleger (F.R.G.) 151
Neuronal firing in the pallidal region: firing patterns during sleep-wakefulness cycle in cats (EEG 03295)
by L. Detari, G. Juhasz and T. Kukorelli (Hungary) 159
High frequency scalp potentials evoked by a reaction time task (EEG 03307)
by D. Krieger and M. Dillbeck (U.S.A.) 222
Somatosensory evoked potentials elicited by air-puff stimuli generated by a new high-speed air control system (EEG 03150)
by I. Hashimoto (Japan) 231
Long-latency reflex activity in squirrel monkeys with occlusion of the middle cerebral artery (EEG 03001)
by F.A. Lenz, R.R. Tasker, W.G. Tatton and W. Halliday (Canada) 238
Synchronization of cardiac autonomic neural discharge with epileptogenic activity: the lockstep phenomenon (EEG 03216)
by C.M. Lathers, P.L. Schraeder and F.L. Weiner (U.S.A.) 247
Effect of low concentration stable xenon on the EEG power spectrum (EEG 03305)
by R.J. Sclabassi, R.M. Lofink, A.N. Guthkelch, D. Gur and H. Yonas (U.S.A.) 340
Spontaneous EEG spikes in the normal hippocampus. I. Behavioral correlates, laminar profiles and bilateral synchrony (EEG 03334)
by S.S. Suzuki and G.K. Smith (Canada) 348
Neural correlates of encoding in an incidental learning paradigm (EEG 03280)
by K.A. Paller, M. Kutas and A.R. Mayes (U.S.A.) 360

Study of the constant wave form of ML-AEP in humans (EEG 03230)
by T. Yokoyama, H. Ryu, K. Uemura, T. Miyamaoto and Y. Imamura (Japan) 372
Quantification of peripherally induced reciprocal activation during voluntary muscle contraction (EEG 03303)
by M. Flanders and P.J. Cordo (U.S.A.) 389
The distribution and propagation pattern of motor unit action potentials studied by multi-channel surface EMG (EEG 03264)
by M. Yamada, K. Kumagai and A. Uchiyama (Japan) 395
EMG profiles during normal human walking: stride-to-stride and inter-subject variability (EEG 03085)
by D.A. Winter and H.J. Yack (Canada) 402
Temporal relationships of EMG changes preceding voluntary movement to premovement cortical potential shifts (EEG 03253)
by K. Tanii, T. Sadoyama and M. Sameshima (Japan) 412
Skeletal muscles from which the propagation of motor unit action potentials is detectable with a surface electrode array (EEG 03179)
by T. Masuda and T. Sadoyama (Japan) 421
Neuropathies with prolonged conduction block, single and grouped fasciculations, localized limb myokymia (EEG 01881)
by G. Roth and M.R. Magistris (Switzerland) 428
Stability of frequency during long-term recordings of hand tremor (EEG 01896)
by H. Hefter, V. Hömberg, K. Reiners and H.-J. Freund (F.R.G.) 439
Unloading reflex of a hand muscle (EEG 03254)
by R.W. Angel (U.S.A.) 447
Modulation of reflex and voluntary EMG activity in wrist flexors by stimulation of digital nerves in hemiplegic humans (EEG 03191)
by W.J. Becker, R. Hayashi, R.G. Lee and D. White (Canada) 452
Tendon reflex variability and method of stimulation (EEG 02004)
by J. Stam and K.M. Tan (The Netherlands) 463
Inhibitory and facilitatory effects from the peroneal nerve onto the soleus H-reflex in normal and spinal man (EEG 03368)
by M. Levin and C.E. Chapman (Canada) 468
The orbicularis oculi reflexes in healthy premature and full-term newborns (EEG 01992)
by J. Khater-Boidin and B. Duron (France) 479
Transient responses to load perturbations of the forearm in a monkey with a chronic lesion in the internal capsule (EEG 01757)
by F. Lacquaniti, M. Bianchetti, H. Hummelsheim and M. Wiesendanger (Italy and Switzerland) 485
Specific gating of the early somatosensory evoked potentials during active movement (EEG 01918)
by G. Cheron and S. Borenstein (Belgium) 537
Recording compound action potentials from the optic nerve in man and monkeys (EEG 03224)
by A.R. Møller, J.E. Burgess and L.N. Sekhar (U.S.A.) 549
Transcallosal response (TCR) in the chronic photosensitive baboon preparation, *Papio papio*. I. Premotor cortical stimulation, recovery cycle and neurotropic drug effect (EEG 03267)
by H. Baba and J.A. Wada (Canada) 556
Transcallosal response (TCR) in the chronic photosensitive baboon preparation, *Papio papio*. I. Effect of premotor cortical kindling (EEG 03268)
by H. Baba, K. Ono and J.A. Wada (Canada) 564
Effects of ketamine anesthesia on the rat brain-stem auditory evoked potential as a function of dose and stimulus intensity (EEG 03304)
by M.W. Church and R. Gritzke (U.S.A.) 570

SHORT COMMUNICATIONS

The influence of subclinical epileptiform EEG discharges on driving behaviour (EEG 01959)
by D.G.A. Kasteleijn-Nolst Trenité, J.B.J. Riemersma, C.D. Binnie, A.M. Smit and H. Meinardi (The Netherlands and U.K.) 167
The effect of repeated seizures on anticonvulsant drug response in the kindling model (EEG 03080)
by J.A. Mace and W.M. Burnham (Canada) 171
Changes of the average muscle fiber conduction velocity during a varying force contraction (EEG 03271)
by T. Sadoyama and T. Masuda (Japan) 495

Diagnostic/prognostic significance of photo-evoked eyelid microvibration in neonates with intracranial hemorrhage (EEG 03330)
by A. Yasuhara, A Hori, T. Sugimoto, S. Iwase and Y. Kobayashi (Japan) 584

Photoparoxysmal discharges among patients investigated after a single seizure (EEG 02035)
by M.A. Danesi (U.K.) 588

TECHNICAL SECTION

MAIN ARTICLES

Far-field evoked potential components induced by a propagating generator: computational evidence (EEG 01862)
by D.F. Stegeman, A. Van Oosterom and E.J. Colon (The Netherlands) 176
Auditory steady-state responses: threshold prediction using phase coherence (EEG 03173)
by D.R. Stapells, S. Makeig and R. Galambos (U.S.A.) 260
EEG alpha map series: brain micro-states by space-oriented adaptive segmentation (EEG 01898)
by D. Lehmann, H. Ozaki and I. Pal (Switzerland) 271
Machine classification of infant sleep state using cardiorespiratory measures (EEG 03357)
by R.M. Harper, V.L. Schechtman and K.A. Kluge (U.S.A.) 379

SHORT COMMUNICATIONS

A sputtered gold microelectrode in combination with a multibarrelled micropipette: a low impedance extracellular recording electrode with the facility of iontophoresis (EEG 01923)
by C.S. Goodchild, R.A. Crane, J.A. Bennett, T.W. Ford, C. Kidd and P.N. McWilliam (U.K.) 91
The hydro-electroencephalogram, a novel method of EEG recording (EEG 02016)
by D.E. Maynard (U.K.) 188
Multi-channel amplifier system for computerized topographic EEG analysis (EEG 03341)
by R. Coppola and N.T. Morgan (U.S.A.) 191
A cross-referencing method for simultaneous slow and multiple unit potential recording with implanted electrodes (EEG 03406)
by V. Rowland (U.S.A.) 591

MISCELLANEOUS

1987 — 40th anniversary of the founding of the International Federation of Societies for Electroencephalography and Clinical Neurophysiology 1
What did Caton see? (EEG 01940)
by L.A. Geddes (U.S.A.) 2

BOOK REVIEWS

Tolerance to beneficial and adverse effects of antiepileptic drugs
edited by H.-H. Frey, W. Froscher, W.P. Koella and H. Meinardi 95
Manual of nerve conduction velocity and somatosensory evoked potentials, 2nd Edn.
by J.A. Delisa, K. Mackenzie and E.M. Baran 95
Intractable epilepsy: experimental and clinical aspects
edited by D. Schmidt and P.L. Morselli 96
Advances in neurology. Vol. 46. Intensive neurodiagnostic monitoring
edited by R.J. Gumnit 97
Epilepsy in children
by J. Aicardi 97
Cerebral lateralization: biological mechanisms, associations and pathology
by N. Geschwind and A.M. Galaburda 98
Sleep and its disorders in children
edited by C. Guilleminault 194
Monitoring cerebral function. Long-term monitoring of EEG and evoked potentials
by P.F. Prior and D.E. Maynard 194
Migraine and epilepsy
edited by F. Andermann and E. Lugaresi 388
